

# Pervasive incomplete lineage sorting in primates and its genomic and functional determinants

IKER RIVAS-GONZÁLEZ

under the supervision of Mikkel H. Schierup

Bioinformatics Research Center (BiRC), Aarhus University

## Contents

I	Introduction	2
II	Materials and methods	3
i	The primate dataset . . . . .	3
ii	The automated CoalHMM pipeline . . . . .	3
iii	Selection of quartets . . . . .	5
iv	Filtering of ILS . . . . .	7
v	Filtering and debiasing of parameters . . . . .	8
vi	Inference of the relative $N_e$ . . . . .	9
vii	Recombination, b-scores and conservation scores . . . . .	10
viii	Introns, exons and gene ontologies . . . . .	10
ix	Data processing and visualization . . . . .	11
III	Results	11
i	ILS across the primate phylogeny . . . . .	11
ii	Ancestral population sizes and split times . . . . .	11
iii	Fragment lengths per state . . . . .	13
iv	The ILS landscape . . . . .	14
v	The genomic determinants of ILS . . . . .	15
v.i	Recombination . . . . .	15
v.ii	Telomeres and fusion point . . . . .	16
v.iii	chrX and the PAR . . . . .	17
vi	The functional determinants of ILS . . . . .	18
IV	Additional work	21
V	Discussion	22
